Centerity Solution:

Delivery of real-time cross domain analytics across all geographies, with end-to-end data collection for all technologies to consolidate management and ensure positive user experience. Centralized IT operations can predict problems and deploy resources before customers are impacted.

Centerity uniquely combines all store equipment, software and hardware infrastructure into Dynamic Service Views which give business and store managers a clear view of store operations health. When a problem arises, Centerity provides unique analytics to help isolate the issue in the datacenter, in the store or in any layer in between.

About Centerity Systems

Centerity AIOps is an award-winning software platform delivering unified, enterprise-class IT Operations Analytics (ITOA) improving performance and reliability for any environment, any technology layer, and any management role. Centerity SLA dashboards act as an early warning system for critical business and operational services, evaluating the full technology stack to expose problems, performance anomalies, and fault isolation across applications, operating systems, infrastructure and cloud assets.
